The great thing with this software is that you can .Q: Difference between browser.clearCache() and localStorage.clear()? What is the difference between using clearCache() vs clear()? Is one of them preferred over the other? A: clear is still a local storage method. clearCache is part of the DOM. You should use clear rather than clearCache when you want to remove data

stored in the local storage, clear removes data in the local storage. You should use clearCache method to clear history and cookies stored on the client's computer. You should use clear method to clear all data whether it is local storage or not. This clears the browser's local storage and history, Local Storage and Cookie Storage Local Storage + Cookies = History + Cache + Cookies Preoperative statin therapy and perioperative outcome in coronary artery bypass grafting in hypertensive patients. The aim of this study was to evaluate preoperative statin therapy, as a potential moderator of perioperative outcome in coronary artery bypass grafting (CABG) in hypertensive patients. We included 1,775 consecutive patients undergoing isolated CABG at the Department of Cardiac Surgery, Vejle Hospital, Denmark between September 2003 and December 2011. A total of 866 (49.5%) patients received statin treatment before surgery. A multivariable analysis was performed to evaluate effects of preoperative statin use on perioperative complications and 30-day and one-year

mortality. Preoperative statin use was independently associated with a decreased risk of reoperation (RR = 0.77, 95%CI = 0.62-0.95, P = 0.016), 30-day mortality (RR = 0.57, 95%CI = 0.40-0.82, P = 0.002), and 30-day readmission (RR = 0.66, 95%CI = 0.50-0.89, P = 0.005). Statin premedication was independently associated with a lower risk of 30-day readmission (RR = 0.60, 95%CI = 0.40-0.89, P = 0.010). Preoperative statin use was not associated
