Lion Games introduced the successful action RPG known as Soulsborne at the 2015 Tokyo Game Show. With over three million downloads worldwide, Soulsborne is a good example of how to attract existing and new players to the series. Therefore, once we started development of the brand-new Elden Ring, the team at Lion prepared a new sensation based on the growth of the Soulsborne series. We carefully crafted a new game that would bring this incredible new setting to life, and players will get that unique Elden Ring adventure through fantasy action RPG.

Returning to the Sinshorn Mountains, a gorgeous and familiar world full of unique characters and a myriad of combat and action scenarios that seek to attract players, Lion Games, through diligent development, is pushing further and delivering a new fantasy-like Elden Ring. You have asked for our new Elden Ring, and we have heard your voices. At the moment, Lion Games is trying to improve on the offerings of previous installments: *The Oathbound Rune* and *Bloodborne Gaining Wisdom*.

## **Elden Ring For Windows 2022**

There are countless ways to develop your character. Every action of the game, not only your basic attacks, but also the construction of your character are processed by the CPU. EVERY ACTION IS PROCESSED BY THE CPU In battle, every action you make, whether it be basic attacks, using magic, or constructing your character, is processed by the CPU. As you strengthen your character's stats, your character's abilities will enhance. ALL INFORMATION IS COLLECTED Your character's level, experience points, and skill points are all collected. As you level up in battle, your character's skills and abilities are also improved. When your character encounters a new skill or ability, the information is shown on a "Skill Tree". WITHOUT AN OVER-CONTROLLED SYSTEM EVERY ACTION CAN BE PROCESSED BY THE CPU (1) In battle, you can use your special attacks, as well as auto-attacks and special attacks that you have leveled up by constructing your character. (2) When moving your character, you can enter into battle while you are still walking and you can move your character while you are in battle. (3) You can attack at any time during your dialogue. (4) In this way, you can prevent your character from becoming like a robotic warrior that only moves around during battle. (5) You can even give commands while your character moves. (6) This is the first action RPG that lets you know exactly what will happen when you attack and move your character. AS YOU STRENGTHEN YOUR CHARACTER'S STATS While your character is in battle, the enemy will be moving in one direction, and if your attack hits the enemy, you will gain EXP. And when you reduce the enemy's HP to zero, you will gain a "skill point". EXP AND SKILL POINTS IS GIVEN TO YOU AS REWARDS EXPERIENCE POINTS ARE GIVEN OUT AS REWARDS While you are in battle, if you have amassed a certain amount of EXP and skill points, you will receive a reward. EXP, skill points, and rewards are given in direct proportion to the amount of time spent in battle, regardless of whether or
