Children of the Galaxy is turn-based strategy game with hexagonal maps and turn-based combat. The game is set in a procedurally generated galaxy. The galaxy is influenced by several factors, like number of planets, number of stars, number of research technologies, planets with or without satellite colonies and rare resources. Children of the Galaxy on Steam Description Recently released on Steam, this game is one of those I've always wanted to own but never purchased. The game has a simple premise: you play a race (this can be any race from the included list) that has colonized I can honestly say I've never tried anything like this before and this game caught my attention. There are many options and possible outcomes and really the options can keep you busy for quite some time if you really enjoy the options available. The game is turn-based, so it is great for on the go gaming, or a one player game.

Here I play as, or against, Earth. There are two modes: Campaign and Multiplayer. The campaign takes place in the static galaxy, whereas in the Multiplayer one you can play in different types of galaxies with the same rules. There are two more modes (Limited and Resource Genre), but those are not explained anywhere and don't show up in the settings of the game, so I don't know much about them. In case you don't know the game, here are some of the features: It's turn-based. Your starting resources are determined by the galaxy. 4 Races are included in the game, with different play styles. You can adapt your fleets with specialist modules that are modified from researched ones. You can research new, specialized modules by progressing in the tech tree. There are 7 planets you can colonize. Each planet has a specific resource and you can expand your satellites on them. You can build a city on top of a satellite, but you can only build structures that don't hinder from satellites. You can build basic, residential, industrial and cultural structures. Depending on the planet, you can use a unique race specific structure. You can use multiple fleets in your campaigns, but only one in multiplayer. You can choose your victory condition, as well as the amount of stars you want to fight for, points, money and other things. There's a user friendly interface to choose the settings. I can totally recommend the game. Play Children of the Galaxy!

## GAME OVERVIEW

You are trapped in a magical world of the evil wizard and his wizards minions. The only way to go on is to find the salt and the candle. The witch casts a shadow in the darkness. You can only see by manipulating the line of bright light behind you. Each time the line is broken, you will fall into the darkness.

Click the direction you want to move the cursor in top-left corner to move the first sprite like an arrow. The game is made with the HTML5 canvas, where you will move the sprite characters with arrow keys and click a left mouse button to jump (JSPG).

The powerups are to put the brightness behind you to see in the black shadow. The candles of powerup will return light to the fake witch in order to generate magic and get you out of the black shadow.

**By J Little | 3/17/2014 Presented by: 100 Years of Ontario's Distinctive Sounds - 2014 Edition Ed: Aleksander Hadeed, Prague, Czech Republic Most of the work at Grand River Recordings was finished before Brian left for Prague in February. We went to Prague with the idea that we'd go to a place that at least had the most advanced and inspiring technology we could possibly find. We had to make a decision on whether to invest our (limited) energy on researching or investing in a technology that might be antiquated or outclassed. We decided to take the easiest path, which is to say, the most empowering, that is, leaving all the data capture to our work rate. I suppose there's always some trade-off with this, in that we're not participating in editing or mixing on this system; but its genesis was in our desire to leave everything else to our native industry. We now see there is a lot more we can do on a dedicated system, so we might not be as selective in the medium that stores the material in the long-term when we're more capable of avoiding such potential problems. Ed: Aleksander Hadeed, Prague, Czech Republic This is Sean Paul-Harrison filming part of the Grand River Recordings at the Shaw Grand opening.
