You can turn off hunger, bandits, diseases, etc. It's a small and relaxing game that requires a bit of attention. You will be glad you did. Enjoy :) Core Features ● Hours of fun :-P ● A fantasy city-building RPG inspired by a medieval setting ● A great challenge in the FARM & CHILD CARE section ● A relaxing adventure in the SKILLS section ● Multiple difficulties to choose from ● Multiple seasons ● Hunting and farming to

Disclaimer Just so you know, all game characters are created purely for amusement and do not represent any sort of physical attribute. Some of them may have hair, a nose, a mouth, etc. This is only for the overall appearance and aesthetic appeal. I am not responsible for any loss of work, property, etc. due to being online. Thanks for reading! CORE FEATURES In the game, you play as the "Keeper", an old and wise man. It is your job to take care of your village of peasants, assigning jobs for them to fulfill. As you guide them through life, they will help you in the garden, harvest crops, build houses, etc. to support your village. You must keep them safe c9d1549cdd

My regex so far is: '/[A-Z0-9._%+-]+@[A-Z0-9.-]+.[A-Z]{2,}'/ How can I validate the leading whitespace? (Example: foobar@example.com.br) I need to skip this check if an email is already whitelisted or if the format is correct. A: Do not use regex, it is too slow and can fail. Instead, use filter_var() for its reliability and efficiency: if (filter_var(\$email, FILTER_VALIDATE_EMAIL)) { echo 'Valid'; } else { echo 'Invalid'; } More info: Update: As @Meeru mentioned in the comments, you can also use FILTER_FLAG_NO_PRIVATE to avoid using the filter_var() call (it is more efficient), but filter_var() is usually the better option since it has more features.
