The unit trailer was used to deliver the chocolate-covered "Spicy Nut", which was a flavored version of the sun-candy. Sunshine Cookie Particles, trademarked as SunChips, were the company's first attempt to mass-produce their cookies in a few different shapes and sizes. Before them, Dawn, the company that would eventually make Dole and Hostess, had been innovating in this area, but their cracker-like product did not find much success, and they quickly dropped it.

i have a samsung galaxy m7 with 6.4.0 and i want to try and flash the ahrd to my phone. i need help, i have all the needed stuff. i use blackjang 0.15 +; for flashing. blackjang 0.20 is also required in the step in flashing. i have used s-off, kernel, and ahrd for my device. but something is wrong with my installation i updated my galaxy m7 to 6.4.0 via ahrd method and s-off method..but when i try installing either arhd root method or s-off.it says error or something that i cant access my system partition/bootloader, how do i fix it hello guys, i am having some problems with the ahrd rom installation for my htc one m7.i am able to install the rom and the phone boots into recovery. but when i try s-off it fails, here is the log file that i posted in pastebin: pastebin.com/u3pedcpx. i think i might not be able to download the required image for my device. and i am using the recovery image downloaded from your site. the first step is to flash a custom recovery to your phone. it doesn't need to be clockworkmod recovery, but be sure to download it from somewhere, such as a trusted site like xda-developers.com or the rom manager app found on the play store. rom manager is a much more secure method of obtaining the package, as it doesn't require an internet connection. it's important to wipe all data on your phone before flashing the rom. the galaxy s6 is a powerful device and it's very easy for things to go awry when flashing roms, data can disappear, apps can become uninstalled, and the factory reset can be a very painful process. i can't stress this enough, so you'll want to make sure you back everything up, wipe everything off, and then flash the rom if you're going to do this. 5ec8ef588b
