
Windows Update Agent 7.6.7600.320 Download UPD

i've been looking for a windows 7 update agent 7.6.7600.320 download with no luck.. i don't know why, but the windows update tool downloaded w7update64-patched.exe instead of w7update.exe. i'm using windows update 3.0 on a 64bit machine. i have w7update64-patched.exe but it will not run. any suggestions? i'm trying to install windows 7 on a new pc. i have a 64-bit os on the new pc, and i want to use windows update to install the os. i'm having trouble. first, i tried to install the 64-bit version of windows 7. after i installed it, windows update wouldn't work for the life of me. i also tried to install the 32-bit version of windows 7, but that didn't work, either. i've been having trouble for awhile, and it seems to me that if windows update required this update, it would be listed in the winupdate list. is it really that hard to list every windows update, and add a "this is a mandatory update" statement, or is there a new policy of "we don't list updates because we think people don't like them" i've been having issues trying to install the update. i've tried downloading the update from one of the microsoft websites and using wuauutil to install it as well as by using xable's update manager to download and install the update. i have a clean windows 7 image that i've tried both 32bit and 64bit. i've tried the uac and logged in as administrator. i've even tried the install method in xable's update manager but nothing seems to work. when i install the update, it says that it's successful, but it still doesn't show up in the list. has anyone else had this issue?

Windows Update Agent 7.6.7600.320 Download

i've been having problems with the .386.ru and .256.ru updates. .ru updates are not listed in wuauutil when installing the update and it says it's successful. i've tried the method in xable's manager as well as running wuauutil directly. i can't get my wu agent

to install on windows 7. i have tried downloading the current update from the wua site, but i get the same error that the update cannot be found. i have also tried downloading and installing the wu agent using the xable's manager. both methods do not work. i have also tried to manually install the update using

winuprt. any ideas?
thanks! windows update
is an automatic update
service that helps
protect your system
from software infections
and other harmful
software. you can find
out more information
about windows update
on the microsoft
website. - it is
completely removed
and re-installed and it is

having the same issues.
i can't even access the
installed update tab.

when i check for
updates, i get the error
"error: the update check
failed. contact your
support personnel for
more information." i did
everything i could think
of to get this to run, and
it's still not working. i
tried to run it in admin
mode. i tried installing it

on a different pc. i tried reinstalling it. i tried installing it on a clean windows 7 system. i tried to run it from command line. i tried installing it in safe mode. i tried disabling the firewall. i tried updating it. i tried changing my updates settings, and it still won't work. i tried all of these things, and it still

won't work. i have
verified that it's
installed, and i have
verified that it's
running. i have
rebooted, and it still
doesn't work.
