[16] the game begins with an event that pulls players to alexandria, which is where the first structure is to be built. the first task that the player faces is to choose a tribe; the three primary ones are the egyptians, the indians, and the libyans. [40] the game then introduces the player to the financial features of the game, where the game is won by being the first to score a 100% tax income or complete the city. unlike caesar iii, pharaoh cleopatra does not include the concept of food, but instead focuses on income from resources and taxes. the player can choose to pay tax either through the local ruler, who will pay the taxes for a set amount of time, or directly from the player, who has the option to completely bypass the local ruler. [16] the game also includes other features, such as building of temples and monuments, the government system, the military, and diplomacy. [16]
