False is what we need. and what he does is steal stuff from other people. now we just need a follow up! are we on it yet? Nothing on the moon man you have to wait for the new heist to come out. My hands are probably shaking. Oh I see, thanks. It's a little old school for my taste. A little bit of overkill. Back to the game where most guitar players get the most slack. At this point I've met more people who know how to play the guitar than I've met people who know how to play the bass. And bass players are nearly as unaccomplished. I'm back to making fun of the unaccomplished nincompoops who play the guitar. Back to the game

Oracle has announced the release of a new version of the Oracle Database 12c release 2 product. Oracle Database 12c release 2 includes support for partitioned tablespaces in In-Memory Database (IMD) mode. Partitioned tablespaces are a new feature in Oracle Database 12c release 2. A partitioned tablespace is a named collection of tables that collectively store a combination of virtual and real storage. Each partitioned tablespace may comprise a single or multiple tables. The number of partitions in a tablespace is limited to 64, but it may be expanded beyond that limit if necessary. Partitioned tablespaces also allow creation of tablespaces that store only space initially and later move all the data to tables in a partitioned tablespace. This comes at a cost, as each partition can be created only once, not re-created when moving data between partitions. Oracle Database 12c release 2 also supports the use of In-Memory Database (IMD) mode. IMD mode is designed to enable larger-scale deployments of databases using hardware that is optimized for running databases. IMD mode uses shared system storage to keep data closer to the database and shared hardware such as the disk subsystem and the network. IMD mode is specifically designed to make In-Memory Databases scale better, especially in relational products. The Oracle Database 12c release 2 release notes describe the new features. Oracle Database 12c release 2 is available for download. Sean Michael Kerner is a senior editor at eWEEK and InternetNews.com. Follow him on Twitter @TechJournalist.
